- 4. Fowler's position**

Correct Answer: 4

Question 6

Type: MCSA

The nurse caring for a client with a fractured third cervical vertebrae determines the client is in spinal shock. Which bed position is the most appropriate for this client?

1. Flat
2. Semi-Fowler's
3. Trendelenburg
- 4. Reverse Trendelenburg**

Correct Answer: 1

Question 7

Type: MCSA

The nurse delegates bed making to the unlicensed assistive personnel (UAP). Which client's bed should be made by the nurse and not the UAP?

1. The postoperative client diagnosed with dementia on complete bed rest
2. The client who is diagnosed with myocardial infarction who has bathroom privileges
3. The client with increased intracranial pressure on complete bed rest
4. The postoperative client

Correct Answer: 3

Question 8

Type: MCMA

When delegating bed-making to the unlicensed assistive personnel (UAP), the nurse would instruct the UAP on which items? Standard Text: Select all that
Proper disposal of linens that contain drainage

1. What tubes or dressings the client might have
2. How to make hospital corners
3. Whom to inform if they notice anything unusual
4. Placing the call bell in a specific location for a client with mobility concerns

Correct Answer: 1,2,5

Question 9

Type: MCMA

The nurse is making beds on the medical–surgical unit. What would the nurse do differently when making a surgical bed versus an open unoccupied bed?
Standard Text: Select all that apply.

1. Strip the bed.

2. Do not tuck, miter, or toe-pleat the top covers.
3. Fold top sheets into a triangle at the side of the bed.
4. Place pillows on the chair beside the bed.
5. Raise the bed to a comfortable working height.

Correct Answer: 2,3,4

Question 10

Type: SEQ

The nurse is making an occupied bed for a client who is required to maintain complete bed rest. Place the steps of making an occupied bed in the appropriate order to be performed.

Standard Text: Click on the down arrow for each response in the right column and select the correct choice from the list.

Response 1. Loosen the bottom soiled linens behind the side-lying client and fan-fold them close to the client.

Response 2. Pull linens from the center of the bed and make that side of the bed.

Response 3. Make the side of the bed behind the client and tuck sheets under the client.

Response 4. Position the client supine and place the clean top linen on the bed.

Response 5. Remove the soiled linen from the bed.

Correct Answer: 1,3,5,2,4

Question 11

Type: MCSA The nurse delegates the making of an occupied bed to the unlicensed assistive

personnel (UAP). Which statement made by the UAP would indicate the need for further instruction prior to this assignment?

1. "I will be sure to inform you of any wound drainage."
2. "I will inform you if any of the client's tubes are loose."
3. "I will assess the client's IV tubing."
4. "I will inform you of any problems."

Correct Answer: 3

Question 12

Type: MCSA

The nurse is instructing the unlicensed assistive personnel (UAP) about the different bed positions available. Which statement by the UAP indicates the understanding of the different bed positions?

1. "Fowler's is used when assisting clients to bed for sleeping."
2. "Supine is used when assisting the client with eating."
3. "Trendelenburg is used to promote decreased gastric emptying."
4. "Semi-Fowler's is used for clients receiving gastric feedings."

Correct Answer: 4

Question 13

Type: MCSA
